DATA SCIENCE EXPERIENCE

Boomitra

Senior Data Scientist

Mar 2024 - present

Remote - San Mateo, CA

- Partnered with product, business, and geospatial teams to validate soil carbon monitoring across 5 million acres of farmland, providing actionable insights that drive sustainability efforts.
- Collaborated closely with cross-functional stakeholders to define validation success metrics, influencing the development of sustainability strategies and the ongoing impact measurement of the product.
- Developed and documented a fully functional soil carbon quantification pipeline, enabling seamless collaboration and efficient use across the team, and providing the foundation for future impact assessments.
- Led initiatives to apply advanced Bayesian methods for precise quantification of uncertainties, ensuring robust and reliable data for critical decision-making.
- Facilitated data science best practices within the team, optimizing workflows, improving code quality, and increasing efficiency, while mentoring team members on data science and statistical methods.

Sonic Foundry

Lead Data Scientist

Nov 2022 - Jan 2024

Hybrid - Madison, WI

- Led the creation of the company's first performance metrics tracking system, collaborating with product, engineering, and business teams to drive operational efficiency and align product features with business objectives.
- Applied data-driven insights to optimize sales strategies, reducing client churn and directly influencing the company's revenue growth.
- Deployed and maintained the Metabase dashboard service for company-wide metric tracking, enhancing visibility and enabling data-informed decision-making across teams.
- Built an automated Python and Postgres ETL pipeline, streamlining data integration from Salesforce, S3, and other databases to enable real-time access to key metrics.

Elevance Health (formerly Anthem, Inc.)

Senior Data Scientist

July 2019 - June 2021

Palo Alto, CA

- Designed and patented a system for calculating doubly robust causal effects, improving the quantification of medication effectiveness and enhancing decision-making processes for healthcare interventions.
- Developed and deployed the company's first ETL system, enabling integration of diverse data streams and creating more accessible and actionable data for product and business teams.
- Designed and built the team's first data visualization app, approved directly by the Board of a Fortune 50 company, allowing stakeholders to track critical operational metrics and make informed decisions.
- Partnered with cross-functional teams to define and measure key performance indicators (KPIs), ensuring alignment between product features and business objectives.

Color Health

Data Scientist

Dec 2016 - June 2019

Burlingame, CA

- Developed and optimized Python ETL pipelines, integrating data from multiple business units into a single accessible portal for improved analytics and decision-making.
- Created interactive Tableau dashboards to enhance real-time laboratory operational efficiency and key business metrics.
- Collaborated with business teams to design data visualizations that informed purchasing behaviors and pricing strategies, driving improvements in business performance.

VOLUNTEERING, LEADERSHIP, AND TEACHING

Climatebase / Isthmus Carshare

Sep 2023 - Dec 2024

Climatebase Fellow, Team Lead (part-time)

Remote

- Led a team of data scientists and financial modelers to develop target market models based on user surveys, helping shape strategic decisions for a sustainability-focused carshare initiative.
- Secured a \$10k grant to launch a neighborhood-based, cooperatively owned carshare program, aimed at reducing carbon footprints and promoting sustainable transportation options in the community.
- Partnered with local leaders and stakeholders to assess the feasibility of the project and drive its alignment with broader environmental and social goals.

edX / University of Wisconsin

Nov 2022 - May 2023

Data Visualization Instructor (part-time)

Remote

- Taught a 6-month course on data visualization techniques using Python, Tableau, SQL, and R, helping students develop the skills to communicate complex data insights effectively to a broad audience.
- Mentored students on applying data visualization to drive business decisions, with a focus on delivering actionable insights and informing product development.

EDUCATION

University of Chicago

May 2017

Ph.D. in Biophysical Sciences

University of Illinois at Urbana-Champaign

Dec 2009

B.S. in Engineering Physics with minors in Mathematics and Computer Science
